"Blackrock unveils Aladdin Climate module" | Finextra.com

This is just the beginning – the tectonic shift towards sustainable investing is still accelerating. Whether it is capital being deployed into new ventures focused on energy innovation, or capital transferring from traditional indexes into more customized portfolios and products, we will see more money in motion.

"The Power of Capitalism by Larry Fink" | Blackrock.com

*Who controls the food supply
controls the people;
who controls the energy
can control whole continents;
who controls the money
can control the world.*

Henry Kissinger, 1973

HENRY KISSINGER IN A SPEECH TO THE WORLD HEALTH ORGANIZATION COUNCIL ON EUGENICS FEB 25, 2009

"Once the herd accepts mandatory forcible vaccination, it's game over! They will accept anything—forcible blood or organ donation—for the "greater good." We can genetically modify children and sterilize them—for the "greater good." Control sheep minds and you control the herd. Vaccine makers stand to make billions, and many of you in this room today are investors. It's a big win-win! We thin out the herd and the herd pays us for providing extermination services. Now, what's for lunch, huh?"

Dr. Henry Kissinger

Every company and every industry will be transformed by the transition to a net zero world. The question is, will you lead, or will you be led?

WEATHER

How does cloud seeding work?

Cloud seeding is a method, first pioneered in the 1940s, used to enhance precipitation from clouds, typically to increase rainfall or reduce hail.

- In one technique, a plane flies into a cloud with silver iodide pellets
- The pellets are released into the cloud
- The pellets interact with moisture and promote the formation of ice crystals
- Condensation continues until water droplets are formed and come down as rain
