

Our struggle, is universal, is historical, and it's about our existence..

Our struggle is universal, is historical, and it's about our existence, as a being and human species, against a system which at first is living on us, and second is destroy our existence in its process..

Total negation to this system of relationship is the only answer of Human community to its own historical enslavement and its permanent degeneration! This is the only escape root! There is not anther alternative!

So, those expressions and organizations , such as “right” or “leftist”, “political” or “economical”, “immediate” or “long-term”, “local” or “ otherwise”, “individual right” or “ collective democratic” Has nothing to do with our struggle, but has everything to do with our enemy interest, it's force of influence and manipulation, its domination

The **universal antagonism** between life, humanity, living beings... and the law of capital development is that capital see, treat and use all its living beings as its “food”, as “energy” and a sources of its appetite for universal accumulation (both as capital and as power over life!), universal accumulation/ domination (is that take everything he able to get/ digest , and reproduce/represent / dictate itself as an only universal “being/force”..) is a main driving motive of capital invitation/war/progress against life/humanity!

For life, living habitat and organisms.. to flourish and develop, for social beings, its common functions and interactions, to be develop,

for HUMANITY to be universal and “free” from slavery... than **we must finish** with property, power, capital system ! A system of domination! Of exploiting, organizing, directing and controlling fragmented life, reshaping and directing living humanity under its command in the frame of permanent war of its domination(keep going, developing , expanding and ... itself) and its negation to universal humanity(that is to say first minimizing and reconstructing the level of humanity which is living on and can not exist without it , and not able to tolerant it is existence in the same time! And also both preventing any level of escaping/living (independent/social/organic...) humanity from its commend (live outside it’s domination) and preventing of universal humanity (human community) to develop itself under his eyes!) .. this system ,his existence and domination, is a negation to human community!

Capital is a repetitive system of never ending extraction, accumulation, manipulation and control! That is his process of its both development and domination in and above life! That is its universal power in using and organizing everything (life, humanity, society...) in the frame and direction of its universal progress (never ending in itself!) and domination!

Digitalization of life , is a modification, commodification , valorization, and capitalization of you, of your entire life (as a social/biological /functional being). Digitalization is a technological application/development of **wage labor!** **The Labor is your life, your submission, your readiness to be valorize (including enslavement and death)... and your wage is your “ credit/ permission, able to access ...” to function and stay a live!** Your worth living is totally depends of how much/for how long/ capital use you and extract value from you stay alive! When you are not

value to capital anymore, than your life is finish! Plain and simple!

Digital centralization of our life in the Digital wallet of cap[ital/value/ state! Our entire life in the wallet/ use/mercy of the State

Digitalization of life , is a modification, commodification , valorization, and capitalization of you, of your entire life (as a social/biological /functional being). Digitalization is a technological application/development of wage labor! The Labor is your life, and the wage is your “ right/credit/ permission...” to stay a live!

Total negation to this system of relationship, of Valurezation of life, is the only answer of Human community to its own historical enslavement and its permanent degeneration! This is the only escape root! There is not anther alternative!

“ **Smart contact lenses** are being developed to monitor glucose levels and could eliminate the daily blood sugar pinprick for people with diabetes. You could even have an **artificial lens** implanted in your eye to correct your vision, but such lenses could also one day record everything you see. **Bluetooth-equipped electronic pills** are being developed to monitor the inner workings of your body, but they could eventually broadcast what you've eaten or whether you've taken drugs. And while you can restore hearing with a **cochlear implant**, be aware that it could log data on the audio environment surrounding you....” **Mary Lee, RAND Center,**

2019! by targeting
and using the
global population
as a “ its battle
ground” ! how
about now?! How
about from
Bill Gates Deleted
Documentary

This “*strong empirical impulses*” (Dr Martin), beside impulses of power of superiority to own the world and privatize life on it, is the motor of super rich!

The entire money making class are proud of Bill actions and achievements

To gain back life/universe/ human community and everything else with it, we must not be food/energy, lab .. of capital progress! We must brake its force and end its universal antagonism! We must starve capital to death and kill its motive! We must kill superiority of capital/Money/capitalist/Lord over life by killing its existence!

Adapting/submitting to capital development, following its power and loosing ourselves and detach from life(organic/common) in its process , walking with capital to our Owen mincing process , excepting work/money related submission, vaccine and digital toxic and control, submitting to “anti-life and anti-common” way of functioning (living as abstract, partial, acceptance and submissive, enslavement of Media, Dead style type of “living”...), feeding and allowing capital/State to develop its universalism (its total negation to life..) is only destruction and self scarifies to us and reinforcing capital/ Money/Lord superiority for to dictate more its nature and its atrocity!

“ Emmanuel Macron pushes on with assisted-dying bill: he has said that he will propose a bill legalising “aid in dying” for terminally ill people.” final nail on your life!

They dictate themselves on us, their system is poisoning us, exploiting us, do live experiment on us, disable us, diminish our life, takeaway everything we ever have, and help us to die and reuse our body as well...! total control and Complete journey of of our enslavement life!

“Internet of the body”:Transforming us into digital factory. Invest capital inside us! Transforming our life into capital!

Capital live on us! We are its food! So, We must start our movement with **starving capital to death, by rejecting him! By do not give him anything he want, he dictate, he fabric ate....**

Giving yourself to capital, Contributing, feeding and participating in its development (through giving your life to it, your innovation to making profit and dictate its mass murders, your mind to be unconscious, and believing its Ideologies and concepts, methods and platforms .. all of these only strength and superior its power more.., only capitalize/ modified/ destruct the whole life even feather ..

“ “ The Internet of Bodies, or IoB, is actually an ecosystem. It's a bunch of devices that are connected to the Internet that contain software and that either collect personal health data about you or can alter the body's function. We think of the Internet of Bodies as this collection of all these devices, as well as all the data that the devices are gathering about you. And in health care, Internet of Bodies has been around for quite a while. With the advent of the Internet, it makes a lot of sense to connect your pacemaker to the Internet so that your doctor can be automatically notified if something weird happens, if there's an anomaly. It's natural in a lot of ways to want to understand more about your body, how it functions, how well it's doing.”

“ There are pills now that have an electronic sensor that let a health care provider know whether you have taken the medication. Other things, like precision medicine, so *precision medicine* is the idea of creating pharmaceuticals or treatment specifically for your body, for your personalized treatment. And I think could really help with that because nowadays a lot of health care is based more on average reactions, whereas with data from devices, you might be able to really more precisely treat a certain disease.” Mary Lee, Mathematician; Fellow, RAND Center for Global Risk and Security

Digital ID expected until 2026.

Are you a number?

Defend yourself! NOW

Under capital domination everything is capitalized. Development of capital it is a capitalization of life and nature!

To gain back our life, to leave this type of submissive way of “living”, to end class society for one and all, we must kill this system and liberate humanity from it!

So the destruction of capital power, capital as a universal system, capital as a dead cage for living birds, is in itself a process of liberating all living forces (all birds in its cage !) which formalized, stored, accumulated, privatized, stagnated, been capitalized, and drive by capital relationship... it is a true liberation of bio-life and universal humanity!

Our enemy is not tools, organic knowledge, innovations and technology for humanity, but is a capitalization of them (of life, knowledge, energy and innovations...) for capital itself against humanity!

Our enemy is who own them/ us! it is the power of ownership! and what they do with us! Our enemy is capitalism . Its capitalization/ elimination of our-life and entire humanity!

Our struggle, is universal, is historical, and it’s about our existence..

Total negation to this system of relationship is the only answer of Human community to its own historical enslavement and its permanent degeneration! This is the only escape root! There is not anther alternative!
