

# **Social revolt against all form of enslavement, is a true answer to this capital total war against humanity**

Social revolt against all form of enslavement, and directly organizing our life as a human community ( without intermediate and representation of ownership, money, credit, power, privilege, permission , blessing.....), to bring down the whole structure and pyramid of power, to wipe out all form of class society, **all form of mastery and enslavement....**, this is the true liberation and a true answer and the historical negation of class society, of organizing “society” on the base of power/enslavement

Dictatorship of capital/money is in total war of domination (distraction / submission/modification....) against humanity. The target of this capitalist/ Lord waves of systemic terror ( computer make pandemics, programmable /poison vaccine, propaganda and manipulative make climate disasters, digital ID, digital money, financilization of everything, mass deprivation and starvation, detraction of life and life-stocks, depopulation, dematerialization, dehumanization of our life...), **is you/us! It is your/our total being! It is our existence as a social being and as a species.**

Their aim is to persevere/ top up their wealth/ power/mastery position on a global scale. This is by attacking **your total life ! By** using their power to **turning off your life** , and striping you from your humanity and from any ability/space/ possibility to functioning like human being ( socially, environmentally, biologically, mentally...)!

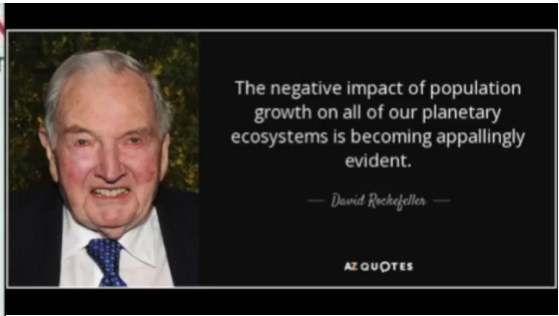

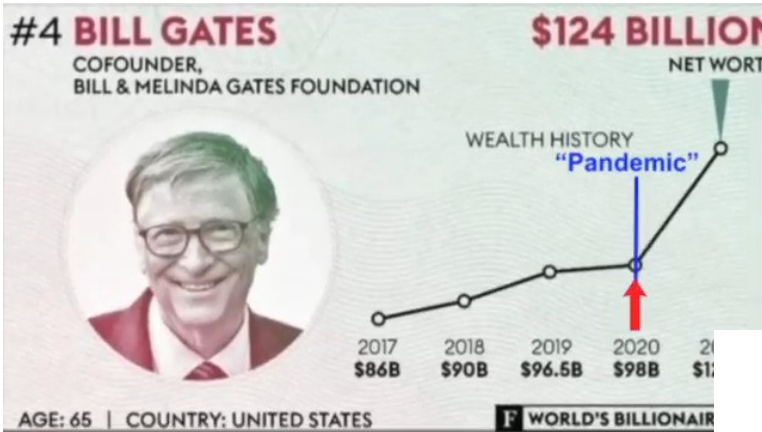

**Their aim** is to, directly and totally (digitally, credit base functioning, manipulation base promotion....) enslave you! It is to own you, own your life, your being, your functions... and use this enslavement (ownership of you and your functions/ life and death!) as a control platform ( as a power drive process) for regenerate value, wealth, their mastery and privilege ...

**Their aim is a total ownership of the planet! Total dictatorship of Money over life. Total manipulation of global population!** Total striping human **species** of organic/social abilities of life and of functioning ( except of those functions/ dysfunctions that their wealth generating model is able to control and use them, able to integrate them in Value creating, switch them on / off as an energy sources of their model )...

**This is a total war against our existence!**  
**It is a war of their power for global domination and control of everything for themselves against human species!**  
**It is a war against human species!**

Everything is happening to us, to life, to planet... is directly under their command! It is their terror and weapon to drive us for where they want us to go and do! They were and are Episodes of their class war against human species!

From Pentagon to CCP, to Club of Rome, to WHO, WEF... What they do, promote, bring about, dictate ... is a mean and their terror to achieve their goal!

So

**The true answer** to this total war ( to save humanity, planet, live... as one action and one direct program) **is a total rebellion!** Total dismantle and distraction of their power and control! It is a total social disobedience, from and against everything they say, they do, they promote, they dictate... it is a **Total Social revolution** ( as deeper and wider as possible! )

listening to them, following them, submitting to their agendas , justifications for their power and behaves ( King Bill Gates, Ellon Musk, CCP, BIC, Club of Room's, NATO, Meta, WHO, WEF ..... ), and any hesitation to take direct action to protect our life against them, and to librate ourselves from them, is our weakness and our

contribution to our own slaughter! It is a real force for their manipulation and execution power over us!

**We are no their followers, we are not listening to them, we are no submissive to their interest ... but we are exactly opposite: we are a totally rejecting of them, of their existence, of their enslavement system! Hour human life is in a total negation with their system! With their war against/ to control our life!**

**We want to live! Our life is everything to us! We are fighting by our life/ for our life to end their power and their war against humanity!**

**For us they are our enemy, the enemy of life, nothing els! So, reject them! Smash their privileges over humanity...  
Reject their power, their programs, their manipulation and their privileges! Come out of their control, take over their wealth , disarm them, smash their power, and pave the way for social life and human community for all**

**Their is not a short cut, a side way, a local, a personal, an isolated project... to avoid or by pass these monsters state and their war! No there is not!**

**Their is no a middle ground, a coalitional way, an institution, a leader, a party, a ready force platform ... to do this fighting through or in our behalf. No there is not! There is only ourselves, an international proletarian class on the move ( just like an a amazing animal/birds migration in nature from one place, one condition to another!!), with our common humanity to guide us...**

## **Demonstration against State /EU**

**Our common life, Our direct force and interest, our anti class and anti slavery understanding of society, above all our permanent need and interaction with total nature for human development... is our program, our direction and our force against all form of enslavement!**

**The true and direct answer to this total capitalist war is a total human revolution!** Starting with rejection/ dismantling of capital/state power and all its forms and platforms of organizations, of organizing/ruling society through means of exploitations- extraction- manipulation- sacrifices ( Money, property,work, trade , war, Media, political shows....) and anti human social constructions of our beings, from human and living beings into workers/boss citizen /self obedience/ political force, lessons , sheep/ cattle type of

obedience, private/public clubs .... and all other forms which serve their interest .

**Their life is their power, their power is their “natural life”! it is their force and manipulation program, it is their wishes and wills, ambition and god /superior style of behaves! It is also their gun on our head!** Their existence is their everything, and it is a master of our slavery! It is our slavery! The real battle is between our life and their power! Between us and them! Between our human project and their Money system!

These super riches , these masters, these manipulators, these gambrels with our life... they can not live without power, with out war, without our submission, without permanent experiments and extreme wast with our life, that is their power, wealth and pleasure.. without their modification to our being and pushing us into inhumanity and beyond!

**We must start our rebellion with the rejection of their existence!** That is the clear pass toward **new life!** **Common and true harmony ( with ourselves and our direct needs, with each-others and their needs, with the whole nature and its unlimited open sources of energy and life..) !**

From the capital historical domination and its rule of our lfve, and from the post shock of dismantling what was common as a “norm”, and also from the confusion and dis bevels that attach to it, there are many attempts, mixture ideologues, projects and so on to “fight back” this destructive capitalist attack, this “hijacking of capital and state”, this “abnormality and madness of elite” .... as they say and

bring back capital/state and its forces to its own since and its “normal and peaceful” social functions!

**Takeover the main Motorway / Africa**

They want to do this through a good will of small capitalist, good governments and leaders, political/religious platforms, through rejuvenating industrial-digital-social projects for all .... and so on! This is to “limit the power of financial” and “save capital from financiers and for the benefit of the all class”! **What a “wonderful makeover” of the brutal reality!**

What ever the reasons and justification of these mixture pro capital attempts, the truth is they are all relying on the power of capital and State to fight the same capital and state which designs, develops, Share, promote and dictate the terror of the super rich!!

**These “disappointment with the moral/power of super rich” are looking head-down and searching capital ground for capitalist**

**solution to capitalist global war! That is in the frame of capital itself! What a joke!**

These types of “reaction, fight/critique, search for good solution” to only current repression ( not to the natural of power and class society) will all other die-out or reintegrate into new norm of capitalist mode of society!

They are all false hope and distraction to our fundamental struggle in the first place! The sooner highlighting their mixture content, their procapitalist interest and their false liberation claims are the better for our movement !

**Our movement feel, understand, recognize and organize itself** directed by humanity and total life against this super rich system (also against value historical progress which is their motor ), against their war, their per-designing programs and political agendas by the

trillionths capitalists and their over- governmental ( super) political party, For extending their “absolute” control over every function and movement in society (see Agustin Carstens, the head of BIS, presenting their reason for dictating CBDC).

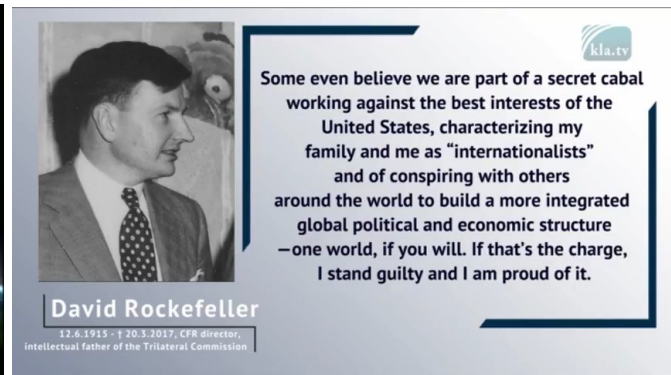

They, ( also value they represent) simply want land, water, air, energy and all other resources with a very limited, well control, programmed and reproduced ( up and down up to their agendas!) servant population. **The rest have to be eliminated!**

**Humanity in the hand of Capital/ State ...A true example of the New World order in action! As you can see, the target is us, it is elimination of our life .** The aim and the out come is more Wealth, resources and power, without humanity! Without us! With minimum slaves! **Wake up!!** pictures from Al/ Haaretz and Aawsat. Com ..

This all to turn the world and beyond ( with everything on/in ) into **their property**, their slaves and trade patents, and use it as their

properties according to their vision and power! **Wake up!!the target is your life!**

This war is not just attacking on workers, farmers and a small producers, not just eliminating use value and material life, but is also a direct takeover of many intermediate and secondary layer of capital and ownership itself, this is a natural tendency of capital/Value itself, in its progress against its base/element of life and much much more to come... **Wake up!! their target is your life!**

**With this fundamental attack**, by the super rich, their international party and their intergovernmental/above day to day governmental dictatorship on **“productive force”**: **on life and beings**, on population and its living environment, on social interaction and social functioning ... and **on humanity as a whole**, that is to protect their wealth and their Sate **from the historical force of social revolution in the first place, and to attack and dismantle that historical party**, to kill its **living force** and integrate its leftover in itself, in whatever way profitable to him, also to

gobbling and vacuum sucking/fish netting/ massive stealing of whatever is still “common wealth, common life, common beings, and common functions...” and was exist outside their full control, and eliminating “useless eaters”, extra material cost, time consuming production force and productions, trade, transport and unprofitable economy, also collecting others positions ( land., water, air, space, biological / social function....) and turn them and patent them all into their property/Asset/ capital/ ownership/ into their family base wealth and power! This is their real game and the rest is just a show! **Wake up whoever are still in duet, and organzine yourselves as a social/living beings against these monsters!**

**We are grateful to The Washington Post, The New York Times, Time Magazine and other great publications whose directors have attended our meetings and respected their promises of discretion of almost forty years. It would have been impossible for us to develop our plan for the world if we had been subjected to the bright lights of publicity during those years. But the work is now much more sophisticated and prepared to march towards a world government. The supranational sovereignty of an intellectual elite and world bankers is surely preferable to the national auto determination practiced in past centuries.**
