

Social revolt against all form of enslavement, is a true answer to this capital total war against humanity

Social revolt against all form of enslavement, and directly organizing of life as a human community (without intermediate and representation of ownership, money, credit, power, privilege, permission , blessing.....), to bring down the whole structure and pyramid of power, to wipe out all form of class society, all form of mastery and enslavement...., is the true liberation and a true answer to the historical question of organizing “society” on the base of power/enslavement

The target of this capitalist/ Lord global waves of terror **is you!** It is **your total being!**

Their aim is to persevere/ top up their wealth/ power/mastery position on a global scale. This by attacking your total life and use their power to turning off your life , and striping you from your humanity and any ability/space/ possibility to functioning like human being (socially, environmentally, biologically, mentally...)!

Their aim is to, directly and totally, (digitally, credit base functioning, manipulation base promoting....) enslave you! It is to own you, own your life, your being, your functions... and use this enslavement (ownership of you and your functions/ life and death!) as a control platform (as a power drive process) for regenerate value, wealth, their mastery and privilege ...

Their aim is a total ownership of the planet! Total stipe of human spices of organic/social ability of life and functions (except of those

functions/ dysfunctions that their wealth generating model is able to control and use, able to integrated in Value creating, switch them on / off as an energy sources of their model)...

This is a total war against our existence!

It is a war of their power for global domination and control off everything for themselves against human spices!

It is a war against human spices !

Everything is happening to us, to life, to planet... is directly under their command! It is their terror and weapon to drive us for where they want us to go and do! They were and are Episodes of their class war against human spices!

From Pentagon to CCP, to Club of Rome, to WHO, WEF... What they do, promote, bring about, dictate ... is a mean and their terror to achieve their goal!

So

The true answer to this total war (to save humanity, planet, live... as one action and one direct program) **is a total rebellion!** Total dismantle and distraction of their power and control! It is a total social disobedience, from and against everything they say, they do, they promote, they dictate... it is a **Total Social revolution (as deeper and wider as possible!)**

lesson to them, following them, submissiveness to their agendas , justifications for their power and behaves (King Bill Gates, Elon Musk, CCP, BIC, Club of Room's, NATO, Meta, WHO, WEF), and any hesitation to take direct action to protect our life against

them and to librate ourselves from them is our weakness and our contribution to our own slotter! It is a real force for their manipulation and execution power over us!

We are not their followers, we are not lessons, we are not submissive, we are not petty projectors ... but very opposite: we are a total rejects of them, their existence, their restrain and their total war against/ to control our life!

We want to live! And Our life is everything! We are fighting by our life/ for our life to end their power and their war!

Demonstration against State /EU

There is not a short cut, a side way, a local, a personal, an isolated project... to avoid or by pass this war! Not there is not!
There is not a middle ground, a collation way, an institution, a leader, a party , a ready force platform ... to do this fighting

through. **No there is not!**

Our common life, Our direct force and interest, our anti class and anti slavery understanding of society, above all our permanent need and interaction with total nature for human development... is our program, our direction and our force against all form of enslavement!

The true and direct answer to this total war is a total revolution! Starting with rejection/ dismantle of capital/state power and all its form and platforms of organization, of organizing/ruling society through means of exploitations- extraction- manipulation- sacrifices (Money, property,work, trade , war, Media, political shows....) and anti human social constructions: workers/boss citizen /self obedience/ political force, lessons , sheep/ cattle type of obedience, privet/public clubs and all other forms which serve their interest .

From the capital historical domination and rules of our live, and from the post shook of dismantling what was common as a “norm”, and also from the confusion and dis bevels that attach to it, there are many attempts, mixture ideologues, projects and so on to “fight back” this destructive capitalist attack, this “hijacking of capital and state”, this “abnormality and madness of elite” as they say and bring back capital/state and its forces to its own since and its “normal and peaceful” social functions!

They want to do this through a good well of small capitalist, good governments and leaders, political/religieuse platforms, through rejuvenating industrial-digital-social projects for all and so on! This is to “limit the power of financial” and “ save capital from financiers and for the benefit of the all class”! **What a “wonderful makeover” of the brutal reality!**

What ever the reasons and justification of these mixture pro capital attempts, the true is they are all relying on the power of capital and State to fight the same capital and state which design, develop, Share, promote and dictate the terror of the super rich!! These “disappointment with the moral/power of super reach” are looking head-down and searching capital ground for capitalist solution to capitalist global war! That is in the frame of capital itself! What a joke!

These types of “reaction, fight/critic, search for good solution” to only current repression (not to the natural of power and class society) will all other die-out or reintegrate into new norm of capitalist mode of society! They are all false hope and distraction to our fundamental struggle in the first place! The sooner highlighting

their mixture content, their procapitalist interest and their false liberation claims are the better for our movement !

Our movement feel, understand, recognize and organize itself against this super rich (also value historical progress) war as a per-designing program and political agenda by the trillionths capitalists and their over- governmental (super) political party, For extending their “absolute” control over every function and movement in society (see Agustin Carstens, the head of BIS, presenting their reason for dictating CBDC).

They (also value) simply want land, water, air , energy and all other resources with a very limited, well control, programmed and reproduced (up and down up to their agendas!) servant population .

pictures from Al/ Haaretz and Aawsat. Com .. **Humanity in the hand of Capital/ State**
A true example of the New World order in action! As you can see, the target is us, it is
elimination of our life . The aim and the out come is more Wealth, resources and power, without
humanity! Without us! With minimum slaves!

Turn the world and beyond (with everything on/in) into their property, their slaves and trad patents and use it as their properties according to their vision and power!

This war is not just attack on workers, farmers and a small producers, not just eliminating use value and material life, but is also a direct takeover of many intermediate and secondary layer of capital and ownership itself, this is a natural tendency of capital/Value itself, in its progress against its base/element of life and much much more to come...

With this fundamental attack, by the super reach and their international party, on “productive force”: on life and beings, on population and its living environment, on social interaction and social functioning ... and on humanity as a whole, that is to protect their wealth and their Sate **from the historical force of social revolution in the first place, and to attack and dismantle that historical party** , kill its living force and integrate its leftover in itself, in whatever way profitable to him, also to gobbling and vacuum sucking/fish netting/ massive stilling of what is still “common wealth, common life, common beings” that was exist outside their full control , and eliminating “useless eaters”, extra material cost, time consuming production force and productions, trad , transport and unprofitable economy, also collecting others positions (land., water, air, space, biological / social function....) and turn and patent all into their property/Asset / capital/ ownership/ into their family base wealth and power!

Today there is an important waking up, rebellions , resistance and fighting back around the world against this super rich’s war on our life .

The main contradictory between human species and capital is a driving force of this awakens! The clear antagonism of humanity/ life/ whole living against capital accumulation, and capitalist way

of “life” and elimination of humanity in its process of never in-itself ending domination..!

In 2023, State in Iran executed at least 834 people, most of them were from our anti repression movement!

EU- Farmers against World order attack on their life and life stakes!

Our historical movement is in its clear and direct pass in recognizing and expressing itself as a **living movement of life and human species** against class - power and its permanent wealth/war base society.

This our clear movement, for ones and all, put in its dustbin the old ideologies and manipulation programs of left and right, progress and backward, economical and political “struggles”, immediate and historical interest and many more manipulation programs. And also “new” health, claimer, depopulation, digital terror ... !

Africa/ revolt against global repression to their life

We are awake and we are fighting back ...

Forward to generalization of this quality of understanding, organizing and social struggling of our universal/species movement and deeper means us possible)! Of total overcome capital society and its never ending terror!
